

## CMSC 117: Introduction to Computing: Interactive Systems

### Assignment 2: Self-Portrait

Due by Class (1:30pm) February 17, 2010

The second assignment asks you to create a self-portrait. Your sketch should:

- use at least two different shape primitives (e.g. point, line, rect, quad, ellipse);
- use at least three colors or shades of gray (sorry, no black and white self-portraits);
- be dynamic in some way (e.g. change your expression as time passes, react to the mouse or keyboard).

#### Learning Objectives

- Understand the processing coordinate system.
- Use processing shapes.
- Create a dynamic sketch.

#### Deliverable

Submit an electronic copy of your sketch via moodle. It should be named:  
**cmsc117\_selfportrait\_NAME.pde**. Also, consider posting your sketch to openprocessing.
